

2-Methoxyethyl acetate

Product Stewardship Summary

Chemical Name:	2-Methoxyethyl acetate
Synonyms:	Methyl glycol acetate; MeCsac
CAS Number:	110-49-6
EC (EINECS) Number:	203-772-9
Revision number:	1-2024

- **Chemical identification and uses:** 2-Methoxyethyl acetate is an organic flammable compound. It is a clear colorless flammable liquid with a fruit-like odor. It is used as a solvent and in the production of photographic films, textile printing, various gums, resins, waxes, and oils.
- **Potential exposures:** Exposure to 2,2,2-trifluoroethanol can occur in industrial/manufacturing facilities and/or during consumer use where the chemical solution is handled. Workers risk exposure primarily through inhalation, skin and eye contact. Good manufacturing and industrial hygiene practices should be followed to prevent or reduce contact. See the Safety Data Sheet (SDS) for additional information.
- **Human Health hazards:** It is non-genotoxic but can be harmful in contact with the skin or if swallowed or if inhaled. It can cause reproductive or developmental harm based on animal studies. It is not considered a carcinogen by NTP, IARC, or OSHA. One should refer to the Safety Data Sheet (SDS) for additional information and any protective information.
- **Environmental Health hazards:** While it is not expected to be toxic to aquatic species nor to be persistent, it should not be released into environment.

This product stewardship summary is intended to give general information about the chemical or categories of chemicals addressed. It is not intended to provide an in-depth discussion of all health and safety information. Additional information on the chemical is available through the applicable Material Safety Data Sheet which should be consulted before use of the chemical. The product stewardship summary does not supplant or replace required regulatory and/or legal communication documents. Statements concerning use of our products are made without warranty that any such use is free of patent infringement and are not recommendations to infringe any patent.
