Honeywell

RTP Green Fuel

Product Stewardship Summary

Chemical Name:	RTP Green Fuel
Synonyms:	Fast Pyrolysis Bio-oil; pyrolysis liquid
CAS Number:	1207435-39-9
EC (EINECS) Number:	692-061-0
Revision number:	1-2022

- **Chemical identification and uses:** RTP green fuel is a highly viscous organic liquid with a dark brown to black color. It is used as a fuel in mobile or fixed combustion plants of mineral oil products as well as fuels in closed systems.

- **Potential exposures:** Exposure to RTP Green Fuel can occur in industrial/manufacturing facilities where the chemical is handled. Workers risk exposure primarily through inhalation, skin and eye contact. Good manufacturing and industrial hygiene practices should be followed to prevent or reduce contact. See the Safety Data Sheet (SDS) for additional information.

- **Human Health hazards:** RTP Green Fuel can be fatal if swallowed enters the airways. It also causes severe skin burns and eye damage. It contains materials which can cause cancer and is classified as a human carcinogen. One should refer to See the Safety Data Sheet (SDS) for additional information and any protective information.

- **Environmental Health hazards:** It is harmful to aquatic life with long lasting effects and is not readily biodegradable.
